

WATER CADDY, 30 GAL. DRY CAMP

This two 2-in-1 Water Caddy design saves trailer space by allowing you to haul 30 gallons of fresh water and doubles as a saddle rack. We manufacture it with FDA approved Polyethelene so the water is safe for you and your animals to drink. The 44" length will accomodate one large Western Saddle or two English Saddles. The 3/4" drain inser is located in the bottom right of the front side in a recessed spot and quickly attaches to a standard garden hose. The aluminum 3/4" drain insert ensures the drain attachment spot will never break, sunrot or fail. The fill cap is located near the peak on the front as well as a vent cap for increased draining speed. Translucent poly allows you to see easily check water levels in the tank.
